

Fitting R1290 & R1291 Sliding Mechanisms into Standard ABS Rack Cases

Most standard ABS Racks from 4U up have an internal panels that obstruct the fitting of any Penn R1290 & R1291 sliding units within the middle of the case.

See Pic Below

6U Case

What stops this application are the 4 adjustment fittings currently being used. Change these for M4 x 8mm PH screw with an M4 Serrated Flange Head nut - The problem goes away. THE OTHER BENEFIT IS THAT THE ADJUSTMENT OF THE MOUNTING EARS CAN BE NOW BE DONE WITH JUST A SCREW DRIVER
